SETUP UPDATES

Hey everyone, hopefully you've all had a good day?

I'm excited to say that Australia, Austria, Bahrain, Canada, China, Japan, Jeddah, Miami, Silverstone and Spain Setup update is now live. These are all up to V2 spec as of now.

These setups all follow the same concept, comparing to the V1 spec of the setups, the changes lead to better top speed, better rotation, better consistency and overall a more intuitive driving experience. Hopefully you all enjoy the updated feeling to the car :)

In my previous message, I did say Imola would be the next updated track, but... these setups were ready to go so I preferred to get these out asap. Imola is planned to be updated next week, alongside the track guide posted to social media

Until then, have a fantastic rest of your day and enjoy the weekend :)
